**Architectural Acoustics (AA)**

The scope of the Technical Committee on Architectural Acoustics encompasses the following areas of interest as applied to sound in and around buildings:

- |   |  |
|---|--|
| 1. Room finish treatments, surface shaping, volumes, and geometries | 3. Noise and vibration control of building systems |
| 2. Airborne and structureborne sound isolation and noise control    | 4. Electroacoustic and media systems               |
|   | 5. Perception and psychoacoustics                  |
|   | 6. Modeling and auralization                       |
